MT FURNITURE

MT Furniture, based in Zhongshan City of Guangdong Province, is a designer, manufacturer, and exporter of outdoor and hospitality furniture. It is a leading brand in southern China's outdoor furniture industry and a strong proponent of relaxed, nature-centric lifestyles.

Since its start in 2006, MT has been positioning itself to become a talent-driven enterprise. The MT team consists of the best managers, engineers, designers, as well as craftsmen from the industry, who are leading the company to new heights.

In the outdoor furniture industry, MT has become a name synonymous with creativity and quality. This is achieved by using the most advanced machinery and technologies and by imposing rigorous quality controls. All of the MT furniture is handmade by the best craftsmen in the industry, and many new furniture collections are added to its catalog every year. This is what has made MT competitive in the global outdoor furniture market.

MT started to build a new 13-storey office building back in September 2021, and it was put into service in Spring 2022. Aside from offices, the building also features a 500+ square meters rooftop garden (an outdoor showroom per se), as well as a 1000 square meters refurbished indoor showroom.

It is worth mentioning that MT currently works with art design studios from a dozen universities here in China. Together they created plenty of great works in smart home furnishing, smart lighting, and pet furniture. MT and its collaborators were the winner of 2023 Reddot Award, 2021 European Product Design Award (EPDA), 2023 Zhongshan Craftsman Furniture Luban Award, among others.

The company has been supplying quality custom outdoor furniture to some of the largest hotel brands in the world, and offering its customers tailored ODM solutions. In the future, MT will continue its efforts to lead in China's outdoor furniture industry, and deliver the best products to the rest of the world.
